Electrical phenomena have been studied since antiquity, though progress in theoretical understanding remained slow until the seventeenth and eighteenth centuries. The theory of electromagnetism was developed in the 19th century, and by the end of that century electricity was being put to industrial and residential use by electrical engineers. The rapid expansion in electrical technology at ...

While the National Electrical Code has many ampacity tables, virtually all deal with the large conductors used in power wiring. The smallest conductor in the ampacity tables in Article 310 is 18 AWG. An ampacity table for 4-pair, 22, 23, 24 and 26 AWG cables was introduced in the 2017 NEC based on an extensive fact-finding investigation conducted by Underwriters Laboratories (UL). As indicated ...

In the 5th edition, in addition to the quantitative revision of hundreds of end-of-chapter problems, over 135 completely new ones have been added. Of these, 88 are molecularscene problems, which, together with the 52 already present from the 4th edition, offer abundant practice for the skills learned in the molecular-scene sample and follow-up problems. The remaining new problems incorporate ...
