"The decipherment of Linear B opened up, and indeed created, a whole new branch of scholarship. It added about 500 years to our knowledge of Greek, catapulting our understanding of early Greek history and society back into the second millennium BC, to the end of the Bronze Age at about 1200BC," said Dr Torsten Meissner, organiser of today's conference.

"Suddenly the places of the figures of Greek

of Linear B between 1951 and 1953. At first Ventris chose his own numbering method, but later switched to Bennett's system. His initial decipherment was achieved using Kober's classification tables, to which he applied his own theories. Some Linear B tablets had been discovered on the Greek mainland. Noticing that certain symbol combinations appeared only on the tablets found in Crete, he conjectured that ...

The decipherment of Linear B is a thrilling enough subject not to require further attractions. Yet the very human story of both Ventris' genius and the community of academics who attempted (and still attempt) to understand this script and it's authors is compelling. The one thing missing is, understandably, a nod towards John Chadwick's own central part in this field. The complements of modesty he pays towards

DECIPHERMENT OF LINEAR B
Early attempts at deciphering Linear B were all based on the assumption that it transcribed an unknown language used only by the Cretans who built Knossos. However, Ventris believed that the language might have been something based off of Greek or Etruscan. This theory was supported by the research of Alice Kober, who noticed that similar strings of characters would ...

Michael George Francis Ventris, OBE (/ ' v ε n t r ɪ s /; 12 July 1922 – 6 September 1956) was an English architect, classicist and philologist who deciphered Linear B, the ancient Mycenaean Greek script. A student of languages, Ventris had pursued the decipherment as a personal vocation since his adolescence. After creating a new field of study, Ventris died in a car crash a few weeks ...
